

Why do we need the Next Generation Fuels Act?

Because Higher Ethanol Blends:

- Are environmentally friendly, reducing greenhouse gas (GHG) emissions by up to 52% compared to gasoline.
- Improve air quality, replacing petroleum sourced octane boosters, many known to be carcinogenic.
- Save consumers money at the pump. Ethanol is the lowest cost, commercially available source of octane on the market.
- Improve engine performance. Higher octane fuels will enable auto manufacturers the ability to introduce new technology driving improved engine efficiency .
- Increase domestic energy security thanks to homegrown corn-based ethanol.
